Instructor: Ron Kovatch

HAND-BUILDING PROJECT

Build a life size self-portrait from the shoulders up using the coil-building technique. The portrait should be constructed on a 12" x 24" plywood board available in the studio.

Your self-portrait may be realistic in style, or abstract, or may project an inner personality. In the past, students have recreated themselves as mythological figures, celebrities, animals, and buildings. Be creative with this project.

Dry Due Date usually 3 weeks

* Limitation use no mirror or
photographs
